I have unique perspectives and insights that can be applied to design in a way that is meaningful and valuable.

Education

Milwaukee Area Technical College
Associate's Degree in Graphic Design
2023

Skills

Adobe InDesign
Adobe Illustrator
Adobe After Effects
Adobe Photoshop
Avid ProTools
Team Communication
Concept Development

Experience

X-Ray Arcade **Cudahy, Wisconsin** **Graphic Designer** **July 2023-Present**

My work for X-Ray includes reformatting, updating and editing pre-existing flyers for their template as well as creating original pieces to advertise events at the venue. I also create, update and maintain event pages on their website. X-Ray operates under tight deadlines and a critical announcement schedule, and I enjoy working with the team to keep things organized and on-time. Reworking other designers' admats to fit in to the arcade's template and style guidelines provides many unique and interesting challenges, and this job has taught me a lot about problem solving and finding new approaches to design.

Redwall Screen Printing **Oak Creek, Wisconsin** **Graphic Designer** **July 2023-Present**

As a designer at Redwall, I am responsible for creating designs and typesetting customer requests, communicating with clients, and creating separations for screen printing on a fast and flexible production schedule. This job has taught me a lot about designing efficiently, file management, and multitasking.

Fuel Cafe **Milwaukee, Wisconsin** **Barista** **April 2021-Present**

My favorite part of this job is the opportunity that espresso presents: the daily opportunity to focus on craft and quality. This job has required me to work very independently while maintaining strong and constant communication with management and other departments. Inventory management and ordering, food preparation, and money handling and depositing were all part of a job focused on customer service. I open and close the cafe daily and have trained several other employees in my position.

Orchard Street Press **St. Francis, Wisconsin** **Production Floor** **June 2018-August 2020**

This job taught me a lot about time management, maintaining a production schedule, and the fine art of screen printing. While working in this screen printing facility I learned about packaging and shipping products, managing orders and invoices, helping with the duties of the receiving department, mixing inks for color matching, finishing procedures for many types of apparel, maintaining a production schedule, cleaning and reclaiming screens, and intensive quality control at a very high pace.
